

2.4

CS435 | Ch 2.4 - Setting Default values

• Setting Default values

Ex:

```
CREATE TABLE cats3
```

```
(
```

```
  name VARCHAR(100) DEFAULT 'unnamed',
```

```
  age INT DEFAULT 99
```

```
);
```

Field	Type	Null	Key	Default	Extra
name	Varchar(20)	YES		no name	
age	int(11)	Yes		99	

Prevent Null values

Ex.

```
CREATE TABLE cats4
```

```
(
```

```
  name VARCHAR(100) NOT NULL DEFAULT 'unnamed',
```

```
  age INT NOT NULL DEFAULT 99
```

```
);
```

// Requiring stuff to be not null

// So you can't even insert it

// manually
