

3.3

CS435 / ch3.3 - Intro to Where

• The WHERE clause

• WHERE - used when we're trying to update every single thing or delete every single thing.

Ex.

SELECT * FROM cats WHERE age = 4;

Disp:

cat_id	name	breed	age
1	Ringo	Tabby	4
4	Egg	Persian	4

For strings

SELECT * FROM cats WHERE name = 'Egg';
