CS435 | Ch3.5 - The UPDATE Command

• Update

- How do we alter existing data?

Keywords:

UPDATE and SET

EX: UPDATE cats SET breed = 'Shorthair'
    WHERE breed = 'Tabby';

Before

name	breed
Ringo	Tabby
Misty	Tabby

After

name	breed
Ringo	Shorthair
Misty	Shorthair

Ex: Specific Entry in Table
    UPDATE cats SET age = 14 WHERE name = 'Misty';

A good Rule of thumb
   Try Selecting before you update
